You know? I love TAG's way of uncovering this out, this tragedy represents much more than confiscation (estemlak) of his buildings, it represents where is the law and where is rights of the citizens, its all in the pocket of who have authority... and then every one will ignore what is going on except the citizens themselves and the people who is afraid about the reputation of Jordan .

But with going deeply into the case you will be sure that our Kingdom with all honor full people would never let this continue and every one will get his right back because we are in well distinguished country where such a thing will never happen.

Everyone is waiting for the last episode of this story.

Mohammad Hassan
